TECHNICAL SKILLS

Frontend Development: HTML, CSS, JavaScript, React, jQuery, Bootstrap, Tailwind CSS

Backend Development: JavaScript, Express, GraphQL

Databases: MongoDB, MySQL, Sequelize, Mongoose

DevOps: Heroku, Netlify, Render

PROJECTS

Wellness Hub | *React, Tailwind CSS, Vite, Figma* | Repository Sept 2024

- Collaborated with an agile team to develop a responsive PWA displaying medical resources for patients. Made responsive using React and Tailwind CSS, based on professional Figma designs.
- Provided a high performant, efficient, and scalable application for over 1000+ monthly users.

Render File | *JavaScript, React, Node, YouTube Data API, Tailwind CSS* | Repository July 2024

- Design and build a web app with the MERN stack featuring a schedule of future events and recordings of past events for a musical artist. Youtube content is fetched from the Youtube Data API and then parsed to target the requested content. Conditionally rendered content to prevent unnecessary network calls.
- Admin mode functionality allows the owner to change the schedule data easily and remotely.
- Sole developer.

Meal Map | *JavaScript, MongoDB, React, Node, GraphQL, GooglePlaces, Stripe* | Repository May 2024

- Work in an agile team to build an app to provide restaurant suggestions for a user in a given area. JWT is used for a secure login/signup functionality and GraphQL for any CRUD operations. All restaurants are fetched using Google places API and user donations are collected using Stripe payment platform.
- Independently designed database for application.

EDUCATION

University of Toronto Toronto, ON

Full-Stack Web Development Certificate *November 2023 - May 2024*

University of Toronto Toronto, ON

Bachelor of Jazz Performance (Saxophone) *September 2018 - April 2023*

EXPERIENCE

Freelance Web Developer June 2024 - Present

Self-Employed *Remote*

- I worked with the MERN stack, developing web applications using both RESTful and GraphQL APIs. I collaborated in agile environments, and worked implementing designs from Figma provided by UX/UI professionals. My role involved full ownership of the development process, ensuring high-quality solutions tailored to client needs.

Server and Bartender April 2022 - Present

Collective Arts Brewing Taproom *Toronto, ON*

- Collaborate with team to provide timely and efficient service.
- Maintain up-to-date product knowledge to assist customers.
- Reorganized inventory for optimized access and workflow.
